

SURGICAL GLOVE SOLUTIONS

DEVELOPED, PRODUCED & PACKAGED IN EUROPE

MILE STONES

GROUNDBREAKING BEGINNINGS

Semperit is founded by Johann Nepomuk Reithoffer, a tailor, entrepreneur and inventor specialising in waterproof fabrics. His patented weaving machine marks the start of the European rubber industry.

OUR FUTURE HOME

Construction commences on a factory in Wimpassing, Austria, which will one day house Sempermed's surgical glove production and research and development centre.

19 20

FIRST GLOVES

Semperit starts producing latex gloves.

GLOBAL APPEAL

Sempermed surgical gloves are donned by professionals around the world.

A NEW EUROPEAN MARKET LEADER

Sempermed® Supreme, one of the most frequently used powder-free surgical gloves in Europe, establishes itself as a glove of choice for surgeons.

INNOVATION AWARD

Our patented photochemical process, used to manufacture the skin-friendly, accelerator-free Sempermed® Syntegra UV, is awarded the prestigious EARTO innovation award.

SUSTAINABILITY & SKIN-FRIENDLINESS

The innovative Green Glove Technology introduces a new level of sustainability in glove manufacturing.

WHY SURGEONS TRUST SEMPERMED

Listening to healthcare professionals and observing them at work, we understand which innovations make a real difference in the operating room. We continuously push for new products that empower and protect surgical staff, care for even the most sensitive skin, and are manufactured in a more sustainable manner.

DOUBLE PROTECTION

Sempermed surgical gloves are double-certified*, in accordance with Medical Device Directive 93/42/EEC as well as Personal Protective Equipment Regulation (EU) 2016/425, to ensure your safety. Thanks to an optimised wall thickness, our gloves offer superior tactile sensitivity without making any concessions when it comes to your protection.

*except Sempermed Sensor

SAFE FOR SENSITIVE SKIN

We offer solutions that protect your skin from common allergies. Synthetic materials which are free from allergenic latex proteins, skin-friendly manufacturing methods like our patented UV technology, and our specially developed washing and finishing process significantly reduce the risk of skin allergies.

QUICK AND EASY TO DON

Our surgical gloves possess excellent donning properties thanks to the specially developed Quick Don™ technology. The powder-free synthetic inner coating reduces friction resistance, making our easy-to-don surgical gloves ideal for double-donning and intraoperative glove changes.

A COMPREHENSIVE PORTFOLIO

Surgeons and OR personnel encounter highly sensitive or high-risk procedures in their daily work. Our extensive portfolio, containing features like a micro-rough outer surface or an optimised wall thickness, offer solutions that empower and protect surgical staff and patients.

FULLY ANATOMICAL SHAPE

With a design based on a natural, relaxed hand posture featuring a slightly wider back of the hand, our gloves allow for superior mobility and ensure that hands experience significantly less fatigue, especially during long procedures.

MADE IN AUSTRIA SINCE 1920

We develop and produce surgical gloves in Austria. As a globally operating company with strong European values, we are committed to the International Labour Organisation's standards, are an amfori Business Social Compliance Initiative member, and are always on the lookout for more sustainable solutions.
