

Tube Checker pen

General features

Tube Checker is a water/solvent proof black twin-point pen. Ideal in particular for marking histology cassettes.

Colour: black.

Code	Packaging
11-400	1 pcs.

Distributor: Bio-Optica Milano S.p.A.

Technical features

"Tube Checker" pen enable you to write on paper, plastic, glass and metal. The writings are waterproof after being dried and will not be blurred with water. After drying, written parts become solvent proof against organic solvent mainly used in the lab such as ethanol, xylene and chloroform.

Use's method: Uncap the pen and start writing. The ink will be dried in 20 seconds or so. To avoid running, do not touch the ink with wet hands or dip in water before it is dried.

Be sure to cap the pen after use. Prevent direct exposure to the sun and keep it in a dark place.

The product is made for generic laboratory use only and it doesn't request CE mark.

For other information regarding handling, storage and risks that it may have, safety data sheet is available.
