

## Plastic Coated Paper

### General Features

Plastic coated paper. For generic laboratory's uses.

Code	Packaging	Sheets size
08-CA2000	100 pcs. (2 x 50 pcs.)	(48 x 60) cm

Distributor: Bio-Optica Milano S.p.A.

### Functional and technical features

Plain and adsorbing filter paper coupled with a polyethylene sheet of 16 g/m<sup>2</sup>, ideal for the cleaning and the sanitation of all laboratories, in specific for sanitary divisions.

- Weight: 145 g/m<sup>2</sup>.
- Thickness: 0.29 mm.

This paper has two main characteristics:

- The blotting side detain the liquids.
- The hydrophobic side avoids that the liquids pass on the below surface.

For this kind of product, particular features for storage and handling are not necessities. This product hasn't expiry date.
